Profile Summary

Experienced in Java 8+ and ReactJS with expertise in Spring Framework, REST APIs, and Cloud Technologies. Proficient in designing secure, scalable applications with JWT-based authentication and role-based access control (RBAC). Skilled in deploying applications using AWS, Docker. Strong background in OOPS, Data Structures, and Database Management Systems (DBMS). Passionate about continuous learning and improving coding efficiency.

Key Skills

- **Programming Languages : Java 8+**(Functional Interface, Lambdas , Streams), JavaScript, Python
- **Frameworks :** Spring MVC, **SpringBoot**, Spring Data JPA, , RestAPI, **ReactJS**, TailwindCSS
- **Database :** MySQL, MongoDB(NoSQL), Flyway, Indexing
- **Cloud & Deployment :** AWS(EC2, S3, VPC), Docker
- **Tools & Technologies**: Git & Github, Intellije Idea,VS Code, Maven, OpenAPI, Postman
- **Design Concept :** RBAC, API Security, Rate Limiting, JWT
- **Core Concepts**: **OOPS**, Data Structure and Algorithm, Computer Networks, DBMS, O

Projects

Blog Application | Aug 2025

Tech Stack : React, Redux Toolkit, Appwrite, TailwindCSS
- Built a blog application using React.js with authentication and protected routes
- Implemented Redux Toolkit for **global state management**
- Integrated Appwrite for user authentication and backend data handling
- Used **React Router** for seamless client-side navigation
- Deployed the application on **Vercel**
- Live Demo: https://react-blog-chai-aur-code-t1h9.vercel.app/
    GitHub Repo: https://github.com/tanishjain09/react-blog-chai-aur-code

Multi-Tenant SaaS Project Management (Backend)| Dec 2025 - Present
   Tech Stack: Java, Spring Boot, Spring Security, JWT, Hibernate/JPA, PostgreSQL, H2, Flyway, Maven, REST APIs
- Developed a secure multi-tenant SaaS application using **Spring Boot**, **Spring Security**, and **PostgreSQL** with complete tenant data isolation to support multiple organizations on a single platform
- Implemented **JWT-based authentication and** role-based authorization **(RBAC)** using Spring Security
- Created **RESTful APIs** with pagination, sorting, and filtering using Spring Data JPA
- Designed and built RESTful APIs for **project and task management** features including CRUD operations, status tracking priority management, and dashboard analytic with 95%+ test coverage
- Designed **tenant-aware API** using tenant context resolution to enforce data isolation across services
- Applied **DTO -based architecture** to decouple API contracts from persistence entities
- Integrated **Flyway** for version-controlled database schema migrations

Education Profile

Parul Institute of Engineering and Technology : **BTech in Computer Science (AI)**	2023-Present	CGPA : 8.2
Leo International School, Banswara, Rajasthan	2022 (HSC - 89%)

Certifications

- Spring 6 & Spring Boot 3 Udemy — December 2025
- Computer Networks and Internet Protocol NPTEL — June 2025
- Python Essential Training Linkedin— Feb 2025
- RestAPI HackerRank — December 2025
- Problem Solving (Intermediate) HackerRank — December 2025
