Profile Summary

Computer Science (AI) student with hands-on experience in Java, Spring Boot, React, Node.js, and Python. Built and deployed full-stack web applications, RESTful APIs, and machine learning projects. Strong foundation in Data Structures & Algorithms, OOP, DBMS, and Computer Networks.

Key Skills

- **Programming Languages :** Java, JavaScript, Python
- **Databases :** MySQL, MongoDB, PostgreSQL
- **Frameworks :** Spring Boot, Spring MVC, Spring Data JPA, React.js, Node.js, Express.js
- **Tools & Technologies :** Git, Github, JWT, Hibernate, Postman, Maven
- **Cloud & Deployment :** AWS(EC2, S3, VPC), Docker
- **Core Concepts:** Data Structure & Algorithm(DSA), Machine Learning, Computer Networks, DBMS

Education

B.Tech in Computer Science (AI) | Parul Institute of Engineering and Technology

2023 – 2027 | CGPA: 8.2

Class XII (89%) | Leo International School, Rajasthan

2022

Projects

1. TeamSync - Project Management System | Feb 2025 - Present | [Github](#)

Tech Stack: Java, Spring Boot, Spring Security, JWT, Hibernate/JPA, PostgreSQL, H2, REST APIs, JUnit, Mockito

- Architected multi-tenant SaaS using Spring Boot/JPA & ThreadLocal, achieving 100% data isolation.
- Secured REST APIs with JWT & RBAC using Spring Security; set rate limits to 100 req/min/IP.
- Developed 15+ RESTful APIs with JPA pagination/search, reducing DB query latencies by 30%.
- Wrote 19 unit tests using JUnit 5 & Mockito, covering key business logic across core services.

2. HeartAI - Heart Disease Prediction System | May 2025 | [Live Demo](#) | [Github](#)

Tech Stack: Python, Flask, React, Scikit-learn, XGBoost, SMOTE, Pandas, Docker, Unicorn, Vite

- Developed a heart disease prediction system using 11 clinical features for real-time risk scores
- Trained 5 ML models with hyperparameter tuning, achieving 85%+ accuracy and 0.86+ ROC-AUC scores
- Engineered 4 custom features and used oversampling (SMOTE) to clean and process 918 patient records

3. SmartCampus - Campus Complaint Management System | Feb 2025 | [Live Demo](#) | [Github](#)

Tech Stack: Node.js, Express, React, MongoDB, Mongoose, JWT, Cloudinary, Multer, Vite

- Built a campus complaint portal with JWT authentication supporting student, staff, and admin roles
- Added automatic complaint escalation for overdue issues using cron jobs.
- Configured MongoDB text indexes to enable instant search across titles, descriptions, and locations

Achievements

- Achieved a LeetCode Contest Rating of 1545
- Solved 500+ DSA problems on LeetCode
- Built and deployed 3+ full-stack and machine learning projects

Certifications

- Spring 6 & Spring Boot 3 Udemy - December 2025
- Computer Networks and Internet Protocol NPTEL - June 2025
- REST API HackerRank - December 2025
